Dear Professor

I hope this email finds you well.

I am writing to respectfully request an extension on the upcoming assignment, "[Assignment Title]," which is currently due on [Original Date]. Due to [briefly mention reason, e.g., an unexpected health issue / a personal emergency], I am finding it difficult to complete the work to the best of my ability by the original deadline.

If possible, may I submit the assignment by [Proposed New Date]? I have already completed a significant portion of the task and am happy to share my current progress with you.

Thank you for your time and for considering my request.

ONE SITUATION WHERE POOR DIGITAL COMMUNICATION CAUSED A REAL PROBLEM (THIS CAN BE SOMETHING YOU READ ABOUT OR A HYPOTHETICAL SCENARIO), AND WHAT COULD HAVE BEEN DONE DIFFERENTLY

Project Report:

The Impact of Digital Communication

One notable situation where poor digital communication caused a significant problem is the "Reply All" disaster. In a hypothetical (yet common) corporate scenario, an HR manager sends an email regarding a sensitive performance review policy to an entire department. A disgruntled employee hits "Reply All" to vent their frustrations, accidentally broadcasting a critique of their supervisor to 500 colleagues.

This lack of digital literacy causes immediate reputational damage, creates a hostile work environment, and often leads to disciplinary action or termination. To prevent this, the employee should have practiced the "five-second rule": pause and double-check the recipient list before clicking send. Furthermore, the use of BCC (Blind Carbon Copy) by the sender would have prevented the "Reply All" option from reaching the entire group. Clearer boundaries between private venting and professional channels (like a private meeting) would have saved the employee's career.

THANK YOU
